1. *Adaptation* – the ability of an organism to change its phenotype in response to changes in the environment.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

The subject of this letter was referred to Mr. Griffith by John A. Ladd,
of the CIA staff, who advised that Griffith had been contacted by a
person claiming to be a member of the "Black Liberation Army".

1. The Commission has received information from the Department of the Interior, Bureau of Land Management, that the Bureau is currently conducting a study of the feasibility of establishing a National System of Public Lands. The Commission is interested in this study and would like to be kept advised of its progress.

As a result, the number of people who are not covered by the health insurance system is increasing. This is a serious problem for the government, and it is necessary to take measures to solve it.
